CHECKLIST OF PLANTS OF THE SAN JOAQUIN EXPERIMENTAL RANGE

R. F. BUTTERY AND L. R. GREEN

LIBRARY
CURRENT SERIAL RECORD
★ FEB 5 - 1960 ★
U. S. DEPARTMENT OF AGRICULTURE

FOREWORD

This publication is the result of the efforts of many people distributed over 23 years. The plants named herein represent 58 different families, all present in some degree on the 4600-acre San Joaquin Experimental Range. Range research on any area involves many things, but high in priority always is the discovery, identification, and evaluation of plant species. This is frequently a continuing chore because conditions favorable to all plants seldom if ever occur, and many plants are so short-lived they are difficult to find. Thus the long period required to develop this list.

It is my hope, and I know the authors concur, that this publication will be of use to technicians and administrators.

E. J. Woolfolk, Chief
Division of Range Management Research

A CHECK LIST OF PLANTS OF THE
SAN JOAQUIN EXPERIMENTAL RANGE

by

Robert F. Buttery, Range Conservationist,
Division of Range Management Research,
and Lisle R. Green^{1/}

Miscellaneous Paper No. 23

CALIFORNIA FOREST AND RANGE EXPERIMENT STATION
BERKELEY, CALIFORNIA
FOREST SERVICE--U.S. DEPARTMENT OF AGRICULTURE

^{1/} Formerly range conservationist, California Forest and Range Experiment Station; present address: California State Polytechnic College, San Luis Obispo, California.

PREFACE

The San Joaquin Experimental Range is located near the center of the State in the granite-soil section of the Sierra Nevada foothills. It is in Madera County, 28 miles north of Fresno, California. This 4600-acre experimental area was established in 1934 as a branch station of the California Forest and Range Experiment Station, U. S. Forest Service. Research aimed at increased production from California foothill range through improved management, fertilization, brush control, and livestock management has been carried out since establishment.

The area lies in the "annual grass type" and is characterized by grassy rolling hills with a sparse covering of trees and occasional dense stands of brush. It is in the lower part of the woodland zone between the treeless valley floor and the higher brush and timber belts.

The herbaceous ground cover consists mostly of annual grasses and forbs. In contrast, perennials dominate most western range areas. Ecologically speaking, the area is near the lower limits of the Upper Sonoran Zone. The elevation varies from 700 to 1700 feet, with most of the area lying between 1000 and 1500 feet. Exposures are generally southwesterly.

The drainage basin empties into a small tributary of the San Joaquin River. No permanent streams flow through the area, but springs are numerous and the small drainages carry surface flows during the winter months.

The slope soils are shallow, residual, of granitic origin, and are classed in the Vista series. The swale soils are deeper, alluvial, and are classed in the Visalia series. Both have a low water-holding capacity.

The climate is characterized by mild, rainy winters and hot, dry summers. Snow is rare. Seasonal precipitation usually begins in September and has averaged 19.4 inches, with extremes of 12.3 and 32.1 inches, during the past 23 years. On the average, over 70 percent of the precipitation falls during 4 months, December through March. From mid-May to mid-September there is practically no rain at all.

Seeds of most herbaceous plant species germinate with the first 1/2 to 1 inch of fall rain and grow slowly during the winter. The plants grow rapidly when warm temperatures return in March, reach maturity in April, and are mostly dry by mid-May.

Plant species listed in the text have been collected at the Range during the past 23 years. Standards of abundance for herbaceous vegetation are as follows:

Abundant -- species appears on at least 75 percent of sample quadrats.¹ Only 3 species fall in this category.

Very common -- species appears on at least 15 percent of sample quadrats. There are 18 species in this category.

Common -- species appears on at least 1 sample quadrat.

Uncommon -- species appears each year on the Range and in most pastures, but infrequently in pasture samples.

Rare -- species appears in 1 or 2 locations on the Range, or in especially favorable years, but seldom if ever in herbage samples.

All plant species listed herein were identified by the Division of Range Management Research, U. S. Forest Service, Washington, D. C. The following authority was used for recent changes in nomenclature:

Abrams, Leroy. 1951. Illustrated Flora of the Pacific States. Stanford University Press, Stanford, California.

Botanical names in parentheses are synonyms which have been used at the Range. The following source was used for common names:

Kelsey, H. P., and Dayton, W. A. 1942. Standardized Plant Names. Second Edition. J. Horace McFarland Co., Harrisburg, Pennsylvania. 675 p.

Locally well established common names are also listed for some plants.

INDEX

<u>Species</u>	<u>Family</u>	<u>Page</u>

GRASSES AND GRASS-LIKE PLANTS

Botanical and common name	Occurrence	Habitat
<u>TYPHACEAE</u> Cattail family		
<u>Typha latifolia</u> L. Common cattail Broad-leaved cattail	Rare	Wet swale
<u>GRAMINEAE</u> Grass family		
<u>Aira caryophyllea</u> L. (<u>Aspris caryophyllea</u> Nash) Silver hairgrass	Common	Slope, on shallow soil
<u>Avena barbata</u> Brot. Slender wild oat	Very common	Slope, especially south
<u>Avena fatua</u> L. Wild oat	Rare	Slope
<u>Briza minor</u> L. Little quakinggrass	Common	Swale
<u>Bromus arenarius</u> Labill. Australian brome	Common	Slope, especially south
<u>Bromus mollis</u> L. (<u>Bromus hordeaceus</u> L.) Soft brome or chess	Abundant	Slope and dry swale
<u>Bromus rigidus</u> Roth. Ripgut brome	Very common	Slope, especially shaded, and dry swale
<u>Bromus rubens</u> L. Foxtail brome Red brome	Very common	Slope, all exposures
<u>Cynodon dactylon</u> (L.) Pers. Bermuda grass	Uncommon	Wet swale
<u>Deschampsia danthonioides</u> (Trin.) Munro ex Benth. Annual hairgrass	Uncommon	Lower slope and swale
<u>Digitaria sanguinalis</u> (L.) Scop. (<u>Syntherisma sanguinalis</u> Dulae, Fl. Haut.) Hairy crabgrass	Uncommon	Gardens

GRASSES AND GRASS-LIKE PLANTS

Botanical and common name	Occurrence	Habitat
<u>Distichlis stricta</u> (Torr.) Rydb. Inland saltgrass	Rare	Creek bank
<u>Elymus triticoides</u> Buckl. Creeping wildrye Beardless wildrye	Rare	Dry swale
<u>Eragrostis cilianensis</u> (All.) Lutati Stinkgrass	Rare	Barnyard and garden
<u>Eragrostis diffusa</u> Buckl. Spreading lovegrass	Rare	Barnyard
<u>Festuca confusa</u> Piper Klickitat fescue Hairy-leaved fescue	Uncommon	Slope
<u>Festuca grayi</u> (Abrams) Piper Gray's fescue	Common	Slope, especially south
<u>Festuca megalura</u> Nutt. Foxtail fescue	Abundant	Slope, all exposures and dry swale
<u>Festuca pacifica</u> Piper Pacific fescue	Uncommon	Slope, especially north
<u>Festuca reflexa</u> Buckl. Twoflower fescue	Uncommon	Slope, especially south
<u>Gastridium ventricosum</u> (Gouan) Schinz and Thell Nitgrass	Common	Slope, on shallow soil
<u>Hordeum brachyantherum</u> Nevski (<u>Hordeum nodosum</u> L.) Meadow barley	Uncommon	Dry swale
<u>Hordeum hystrix</u> Roth. (<u>Hordeum gussonianum</u> Parl.) Mediterranean barley	Very common	Wet swale

GRASSES AND GRASS-LIKE PLANTS

Botanical and common name	Occurrence	Habitat
<u>Hordeum leporinum</u> Link (<u>Hordeum murinum</u> L.) Mouse barley Common foxtail	Common	Disturbed soil or lower slope
<u>Koeleria phleoides</u> (Vill.) Pers. Annual koeleria	Rare	Swale
<u>Lolium multiflorum</u> Lam. Italian ryegrass Annual ryegrass	Seeded	Swale and lower slope
<u>Melica californica</u> Scribn. California melicgrass	Uncommon	Rock outcrop
<u>Melica imperfecta</u> Trin. Coastrange melicgrass Small-flowered melicgrass	Uncommon	Rock outcrop
<u>Oryzopsis miliacea</u> (L.) Benth. Smilo	Seeded	Lower slope
<u>Panicum capillare occidentale</u> Rydb. Common witchgrass	Uncommon	Swale
<u>Phalaris californica</u> Hook. and Arn. California canarygrass	Rare	
<u>Phalaris caroliniana</u> Walt. Carolina canarygrass	Uncommon	Wet swale
<u>Phalaris coerulescens</u> Sunol grass	Seeded	Lower slope and swale
<u>Phalaris tuberosa stenoptera</u> (Hack.) Hitchc. Hardinggrass	Seeded	Swale
<u>Poa annua</u> L. Annual bluegrass	Common	Swale

GRASSES AND GRASS-LIKE PLANTS

Botanical and common name	Occurrence	Habitat
<u>Poa scabrella</u> (Thurb.) Benth. ex Vassey Pine bluegrass	Common	Slope, especially north
<u>Polypogon monspeliensis</u> (L.) Desf. Rabbitfoot polypogon Beardgrass	Common	Creekbed
<u>Scribneria bolanderi</u> (Thurb.) Hack. Scribneria	Rare	Slope
<u>Setaria viridis</u> (L.) Beauv. Green bristlegrass	Uncommon	Gardens
<u>Sorghum halepense</u> (L.) Pers. Johnsongrass	Rare	Swale
<u>Stipa cernua</u> Stebbins and Love. Nodding stipa	Seeded	Slope
<u>Stipa pulchra</u> Hitchc. California needlegrass Purple stipa	Seeded	Slope
<u>CYPERACEAE</u> Sedge family		
<u>Cyperus inflexus</u> Muhl. Flatsedge Awned cyperus	Uncommon	Creekbed
<u>Cyperus vegetus</u> Willd. (<u>Cyperus virens</u>) Green flatsedge Tall cyperus	Uncommon	Creekbed
<u>Eleocharis macrostachya</u> Britton (<u>Eleocharis palustris</u> R. and S.) Spikesedge Common spikerush	Common	Wet swale

<u>Nemophila menziesii</u> Hook. and Arn. Babyblue-eyes nemophila	Common	Lower slope
<u>Phacelia californica</u> Cham. California phacelia	Uncommon	Rock outcrop
<u>Phacelia hispida</u> Gray Caterpillar phacelia	Common	Rock outcrop
<u>Phacelia platyloba</u> Gray Broadlobed phacelia	Uncommon	Shaded slope
<u>BORAGINACEAE</u> Borage family		
<u>Allocarya trachycarpa</u> (Gray) Greene Rough-fruited allocarya	Common	Wet swale
<u>Amsinckia douglasiana</u> DC. Douglas fiddleneck	Common	Shaded slope
<u>Amsinckia intermedia</u> Fisch. and Mey. Fireweed fiddleneck	Common	Slope
<u>Amsinckia retrorsa</u> Suksd. Rigid fiddleneck Harvest fireweed	Uncommon	Slope
<u>Cryptantha flaccida</u> (Dougl.) Greene Cryptantha	Common	Slope
<u>Cryptantha hooveri</u> I. M. Johnston Hoover's cryptantha	Uncommon	Slope
<u>Heliotropium curassauicum</u> L. Salt heliotrope	Rare	Disturbed soil

FORBS

Botanical and common name	Occurrence	Habitat
<u>Plagiobothrys canescens</u> Benth. Valley popcornflower	Common	Lower slope and dry swale
<u>Plagiobothrys nothofulvus</u> Gray Redstain popcornflower	Very common	Slope and dry swale
<u>Plagiobothrys tenellus</u> Gray Slender popcornflower	Common	Slope, on shallow soil
<u>VERBENACEAE</u> Verbena family		
<u>Verbena lasiostachys</u> Link. (<u>Verbena prostrata</u> R. Br.) Western verbena	Uncommon	Slope
<u>LABIATAE</u> Mint family		
<u>Marrubium vulgare</u> L. Common hoarhound	Uncommon	Disturbed soil
<u>Monardella candicans</u> Benth. Sierra monardella	Common	Swale
<u>Monardella lanceolata</u> Gray Mustang mint	Uncommon	Swale
<u>Pogogyne douglasi</u> Benth. Douglas pogogyne	Common	Swale
<u>Salvia carduacea</u> Benth. Thistle sage	Common	Slope
<u>Salvia columbariae</u> Benth. California chia	Uncommon	Shaded slope
<u>Scutellaria bolanderi</u> Gray Bolander's skullcap	Uncommon	Wet swale and seeps
<u>Scutellaria tuberosa</u> Benth. Tuberous skullcap	Uncommon	Shaded slope

FORBS

Botanical and common name	Occurrence	Habitat
<u>Stachys albens</u> Gray Whitehedge nettle	Uncommon	Seeps
<u>Trichostema lanceolatum</u> Benth. Vinegar bluecurls	Common	Slope
<u>Trichostema oblongum</u> Benth. Mountain bluecurls	Uncommon	Swale
<u>SOLANACEAE</u> Nightshade family		
<u>Datura meteloides</u> DC. Sacred datura Tolguacha	Uncommon	Disturbed soil
<u>Nicotiana attenuata</u> Torr. Coyote tobacco	Uncommon	Disturbed soil or swale
<u>Solanum nigrum</u> L. Black nightshade	Rare	Lower slope
<u>Solanum xanthi</u> Gray Purple nightshade	Uncommon	Lower slope
<u>SCROPHULARIACEAE</u> Figwort family		
<u>Antirrhinum cornutum</u> Benth. Spurred snapdragon	Uncommon	Slope, especially south
<u>Collinsia bartsiaefolia</u> Benth. Seaside collinsia	Uncommon	Slope
<u>Collinsia bicolor</u> Benth. Pagoda collinsia Chinese houses	Common	Shaded slope
<u>Collinsia tinctoria</u> Hartw. Brownstain collinsia Sticky Chinese houses	Uncommon	Shaded creekbed

FORBS

Botanical and common name	Occurrence	Habitat
<u>Cordylanthus compactus</u> Pennell Muleweed	Uncommon	Rocky slope
<u>Mimulus pilosus</u> (Benth.) Wats. Downy mimulus	Uncommon	Lower slope
<u>Mimulus bolanderi</u> Gray Tobacco mimulus	Uncommon	Shaded slope
<u>Mimulus floribundus</u> Dougl. Monkeyflower	Uncommon	Wet swale
<u>Mimulus nasutus</u> Greene (<u>Mimulus guttatus nasutus</u> Jepson) Common monkeyflower	Common	Wet swale
<u>Mimulus nanus</u> Hook. and Arn. Dwarf monkeyflower	Uncommon	Slope
<u>Mimulus viscidus</u> Congdon. Viscid monkeyflower	Uncommon	Slope
<u>Mimulus pictus</u> (Curran) Gray Painted monkeyflower	Uncommon	Slope
<u>Orthocarpus erianthus micranthus</u> (Gray) Jepson Johnnytuck owllover	Common	Slope
<u>Orthocarpus linearilobus</u> Benth. Pallid owllover	Common	Slope
<u>Orthocarpus purpurascens</u> Benth. Escobita owllover Common owllover	Common	Slope
<u>Penstemon breviflorus</u> Lindl. Stubflower penstemon	Common	Rocky slope
<u>Scrophularia californica</u> Cham. and Sch. California figwort	Uncommon	Rock outcrop

FORBS

Botanical and common name	Occurrence	Habitat
<u>Verbascum blattaria</u> L. Moth mullein	Rare	Lower slope
